

$$\text{Normalized Added Mass: } \bar{A}_{i,j}(\omega) = \frac{A_{i,j}(\omega)}{\rho}$$

Notes:

- $\bar{A}_{i,j}(\omega)$ should tend towards a constant, A_∞ , within the specified ω range.
- Only $\bar{A}_{i,j}(\omega)$ for the surge, heave, and pitch DOFs are plotted here. If another DOF is significant to the system, that $\bar{A}_{i,j}(\omega)$ should also be plotted and verified before proceeding.
